

EURAMED

European Alliance for Medical
Radiation Protection Research

The European Alliance for Medical Radiation Protection Research (EURAMED) is the leading European platform for research activities in medical radiation protection

VISION

Leading European research activities in medical radiation protection and harmonising clinical practice to advance the European radiation protection safety culture in medicine

MISSION

- Improving medical care through sustainable research efforts in medical radiation protection
- Identifying common research areas
- Serving as a platform for medical radiation protection research
- Developing aligned approaches and responses to European research calls

EURAMED was founded by five European medical associations:

- The European Association of Nuclear Medicine (EANM)
- The European Federation of Organisations for Medical Physics (EFOMP)
- The European Federation of Radiographer Societies (EFRS)
- The European Society of Radiology (ESR)
- The European Society for Radiotherapy and Oncology (ESTRO)

EURAMED rocc-n-roll Scientific Research Agenda (SRA)*

In-depth insights into current research
Addressing identified gaps and
research needs

EURAMED rocc-n-roll Research Roadmap

A strategic guide for future
European research
Shaping the direction of medical progress

*Includes an update of the original EURAMED SRA for medical radiation protection research

EURAMED

European Alliance for Medical
Radiation Protection Research

**JOIN
EURAMED**

Institutions, organisations and individuals active or with an interest in the field of medical radiation protection research are invited to **apply for membership.**

Full members

Institutions or organisations active in the field of medical radiation protection research

Associate members

Institutions or organisations that do not actively practice medical radiation protection research, but that have a considerable interest in the area of radiation protection

Corporate members

Enterprises interested in the activities and aims of the Society

Individual members

Interested health professionals or scientists engaged in radiology, nuclear medicine, radiation oncology, medical physics, radiography or related fields

EURAMED complements established European platforms in several other fields of radiation protection, will create visibility for the medical field in this context and looks forward to a fruitful dialogue and interaction with the other platforms to the benefit of Europe's patients.

Contact details

The administrative office of EURAMED is run by the European Institute for Biomedical Imaging Research (EIBIR).

You can contact us at mhierath@eibir.org

Executive Board

President:	François Paris, France
President-Elect:	Graciano Paulo, Portugal
Past President:	Boris Brkljačić, Croatia
Secretary:	Paddy Gilligan, Ireland
Treasurer:	Caroline Stokke, Norway
Member at large:	Guy Frija, France
Member at large:	Ursula Nestle, Germany
